

Prepare for National Day

Example Kitchen | Downtown | Report 12 Sep 2026 | Brief 1

Design preview - Fictional report and source examples

The short version

Make the event offer easy to understand, and check that the team can deliver it well. The useful opportunity is a clear family occasion, backed by reliable service.

Research question

Understand nearby offers and customer expectations so we can plan a useful National Day promotion.

Family offers appear in the local comparison

The sampled public menu includes a family offer. Its visibility does not tell us how many customers buy it. [S1]

Feedback includes praise and delivery concerns

The illustrative review sample contains positive service comments and mentions of delays. It is not a representative customer survey. [S2]

Your business evidence covers an earlier period

The available internal channel evidence is from August, while the external market observations are from September. [S3]

Evidence gaps

This research does not establish competitor sales or profit. Operating capacity is not confirmed, and the internal business evidence covers August.

Competitors and their offers

Rival Kitchen

Family offer is easy to find in its public menu. [S1]

Compare the bundle contents and occasion, not just the headline price.

Neighbour Table

Sample feedback mentions both friendly service and delivery delays. [S2]

Investigate service consistency as a possible point of difference.

Speculative estimate

Rival Kitchen | Monthly sales scenario: AED 45,000-70,000 per month

Speculative estimate, not reported revenue. These are assumed trading volumes, not measured competitor orders.

Scenario only: assume 40-60 orders per day, an average order value of AED 38 and 30 trading days. That gives AED 45,600-68,400, rounded to a broad range. The order volume is an analyst assumption; reviews and visible offers do not establish it. This is sales before costs, not profit.

The local opportunity

A family-focused event offer could be worth exploring if the bundle is clear and the team has enough capacity. Start with the location's existing customer occasion and service constraints.

What to check before committing

Customer occasion: Make the intended customer and the reason to buy explicit.

Operating capacity: Confirm available items, preparation limits and fulfilment coverage at this location.

Commercial fit: Check the proposed offer against costs and the organization's goals before approving a campaign.

Potential opportunity, not a promised result. The report proposes what to investigate; it does not claim that a campaign has earned revenue or profit.

Draft advice for review

Draft one clear family bundle

Use the public offer comparison to identify a clear occasion and explain what the customer receives. [S1] [S4]

Next step: Confirm the items, availability and margin before making it a campaign proposal.

Confirm service capacity before promoting

A promotion is only useful if the location can fulfil the extra demand reliably. [S2] [S3]

Next step: Review preparation times, cancellation reasons and the team's capacity for the chosen period.

Choose a small, measurable trial

A bounded trial can reveal whether the offer attracts useful demand without assuming a financial return. [S3] [S4]

Next step: Define the period, comparison baseline and success measures before seeking campaign approval.

Sources and evidence

[S1] Rival Kitchen | Public menu and offer page

External source | 11 Sep 2026

Illustrative source record for the competitor offer comparison. The production report links each supported statement to the retrieved page and passage.

[S2] Neighbour Table | Public customer feedback

External source | 10 Sep 2026

Illustrative review sample. Positive and negative themes are presented as sampled feedback; they do not establish sales volumes.

[S3] Example Kitchen | Channel evidence

Internal business evidence | Downtown | 1-31 Aug 2026

Illustrative business evidence about fulfilment. Its reporting period is separate from the research date.

[S4] Example Kitchen | Saved growth objective

Business Memory | Updated 10 Sep 2026

Illustrative saved objective and operating constraints. Private business context informs relevance; it is not sent as a public search query.
